SHERIFF SODIQ

✉ SodiqSheriff9@gmail.com   **Portfolio** Linkedin

PROFESSIONAL SUMMARY

I am a full stack developer with a strong love for frontend work building clean, responsive interfaces and real-world web apps that actually work well and look good. I have worked on everything from e-commerce platforms to real-time chat apps, using tools like React, Next.js, TypeScript, and MongoDB. Along the way, I have mentored juniors, contributed to open-source, and kept learning by doing. Whether leading a feature or refining performance, I bring sharp execution, curiosity, and a builder's mindset to every project.

EDUCATION

Moshood Abiola Polytechnic   **2024**
Higher National Diploma (HND) in Computer Science

Moshood Abiola Polytechnic   **2021**
National Diploma (ND) in Computer Science

CERTIFICATIONS AND AWARDS

AWS Certified Solutions Architect   **2023**
Amazon Web Service

React Developer Certification   **2022**
META

Google Cloud Professional Developer   **2022**
Google Cloud

Winner of University Coding Competition   **2022**
University of Lagos

Full-Stack Web Development Bootcamp Certificate   **2020**
FreeCodeCamp

CORE COMPETENCIES

- Frontend Development (React, Next.js, Vue.js)
- Backend Technologies (Express, Flask, TypeScript and JavaScript, Mongo dB, Firebase, Supabase, redux, Zustand))
- UI/UX Collaboration & Design Systems
- Real-Time Applications (WebSocket, Redis, Socket.io)
- Performance Optimization (Lazy Loading, Code Splitting)
- Testing & Documentation (Jest, Storybook)
- Agile Development & Mentoring
- Git, CI/CD, DevOps Collaboration
- AI Engineering

PROFESSIONAL EXPERIENCE

Figpe leading Art   **March 2025 - Present** *Lead Frontend Engineer*   Lagos, Nigeria.

- Spearheaded the development of over 10 high-performance Single Page Applications (SPAs) using React, Vue.js, and TypeScript.
- Reduced average page load time across major projects by implementing advanced optimization strategies such as code splitting, lazy loading, image compression (WebP), tree shaking, and font subsetting.
- Led seamless design-to-code translation by collaborating closely with UX/UI teams, transforming Figma mockups into pixel-perfect, responsive, and accessible interfaces tailored for web and mobile devices.
- Integrated critical third-party APIs including OpenWeather, Stripe, Mapbox, and Firebase, enhancing app interactivity, payment processing, real-time updates, and geolocation features for B2C and B2B platforms.
- Established a consistent component library and reusable design system using Storybook and TailwindCSS, which reduced development redundancy.
- Championed web accessibility by enforcing WCAG 2.1 standards, implemented ARIA roles, semantic HTML,

contrast fixes, and screen-reader compatibility, boosting inclusivity across 6 client-facing applications.

- Mentored and onboarded junior engineers through pair programming, internal code walkthroughs, and structured guides, cultivating a strong engineering culture and accelerating developer ramp-up time.
- Designed and deployed internal analytics dashboards for real-time app monitoring, user interaction tracking, and business KPI visualization using D3.js, Chart.js, and Redux Toolkit, aiding data-driven decision-making for product managers.
- Played a critical role in incident response and bug triage, identifying root causes of frontend issues in live production environments and implementing permanent fixes.

Holoway   **December 2024 – March 2025**
Lead Frontend Devoloper (Contract)   Lagos, Nigeria.

- Designed and deployed high-converting marketing websites and landing pages for startup clients using HTML5, CSS3, JavaScript, and Bootstrap.
- Worked closely with founders, designers, and marketing teams to rapidly develop and iterate digital assets that aligned with brand strategy, go-to-market plans, and customer acquisition objectives.
- Led frontend development efforts in 4 national hackathons, building fully functional MVPs within 72 hours using the MERN stack and Firebase, demonstrating rapid prototyping, problem-solving, and collaboration under pressure.
- Contributed to open-source projects by fixing bugs, refactoring codebases, and enhancing documentation (README, API guides), helping onboard new contributors and improve project scalability.
- Implemented SEO best practices including structured data (schema.org), meta tags, semantic HTML, and sitemap integration, increasing discoverability and organic traffic for early-stage product sites.
- Integrated Google Analytics and custom event tracking across all web projects to support marketing teams with real-time campaign insights and performance dashboards.
- Leveraged Firebase Authentication and Realtime Database in MVPs to enable secure user management and dynamic content updates, expediting feature delivery timelines by 30%.
- Authored clear, maintainable technical documentation, onboarding guides, and dev wikis, laying the groundwork for future scalability and smoother handoffs to internal dev teams.
- Championed cross-device and responsive testing using browser DevTools, BrowserStack, and manual QA processes to ensure flawless performance on desktops, tablets, and mobile.
- Provided mentorship and code reviews to junior developers and interns within the team, cultivating strong engineering habits and increasing code quality across collaborative projects.

Techy Teams   **Sept 2024 – Feb 2025** *Frontend*
Developer   Remote

- Developed modular and scalable UI components with React, TypeScript, and Redux Toolkit, resulting in a 40% boost in frontend performance metrics.
- Worked closely with UI/UX designers to bring complex Figma wireframes to life, ensuring pixel-perfect execution and adherence to accessibility (WCAG 2.1) standards.
- Managed application-wide state using Redux Toolkit and React Query to streamline API interaction, error handling, and data consistency.
- Integrated third-party libraries and RESTful APIs, including payment gateways and analytics tools, improving product functionality and user satisfaction.
- Reduced technical debt by modularizing legacy code and refactoring logic-heavy components, cutting future onboarding time by 50%.
- Authored comprehensive documentation using Storybook for over 20 reusable components, improving developer onboarding and consistency.
- Collaborated with backend engineers to define API schema and enhance frontend-backend communication.
- Participated in Agile ceremonies (standups, retrospectives, sprint planning) and led knowledge-sharing sessions on React performance tricks.

Olaktech
June 2022 – Sept 2024
Frontend Developer & Tutor
                                                    Ogun, Nigeria.

- Delivered scalable, mobile-first interfaces with React, JavaScript, and Tailwind CSS, which improved usability scores by 30% on student apps.
- Conducted weekly live coding workshops and mini bootcamps on React, Next.js, Git, and modern frontend workflows, mentoring over 50 interns and junior developers.
- Spearheaded frontend architecture restructuring for learning management systems, reducing redundant code and improving load speeds by 25%.
- Designed a reusable component library with styled-components and Storybook, promoting UI consistency across 5+ projects.
- Regularly conducted code reviews, enforced linting and testing practices (Jest/React Testing Library), and boosted code maintainability team-wide.

- Provided one-on-one mentorship, helping juniors resolve real-world project blockers, debug live issues, and adopt clean coding practices.

PROJECTS

Mymeticket.com - Full-Stack Ticketing Platform

Fairmoney Redesign - Fairmoney Web App (Redesign Challenge)

School Management Application
