PROFESSIONAL SUMMARY

I build and scale production web and mobile applications for startups and product teams — from API architecture to pixel-perfect frontends. At Figpe, I led development of a high-performance SPA and cut load times by 30% through systematic optimisation. I've shipped 3 MVPs under 6 weeks each, integrated live payment and mapping systems, and built a decentralised Web3 freelancing platform with smart contract escrow and DAO dispute resolution. I write clean, maintainable code and thrive working asynchronously across time zones.

SELECTED PROJECTS

Web3 Freelancing Platform · Solidity · IPFS · React · Node.js · Ethereum

- Solved the trust problem in freelancing by building a decentralised marketplace where payments are held in Solidity smart contracts — funds only release when work is confirmed, eliminating payment disputes entirely.
- Stored developer credentials and CVs on IPFS, removing centralised data control. Implemented DAO voting for dispute resolution — no admin required.
- Chose Ethereum mainnet-compatible architecture with testnet deployment; designed for gas efficiency with minimal on-chain writes.

Real-Time Collaborative Editor (Figma Clone) · React · WebSockets · CRDTs · Node.js

- Built a multiplayer design editor with live cursor sync and conflict-free concurrent editing using CRDT (Conflict-free Replicated Data Type) algorithm — the same technique Figma and Notion use.
- Handled up to 12 concurrent users in load testing with sub-100ms synchronisation latency via WebSockets. Implemented full version history with rollback.

3D Developer Portfolio Dashboard · Three.js · react-three-fiber · React

- Built an immersive 3D experience visualising my dev stack — gyroscope-driven on mobile, mouse-tracked on desktop. Demonstrates WebGL and motion capability for clients who need interactive 3D frontends.
- Kept initial load under 2 seconds using lazy-loaded 3D assets and progressive rendering. Custom lighting and camera transitions built without external animation libraries.

WORK EXPERIENCE

Lead Full-Stack Engineer — Figpe

Mar 2024 – Sep 2025

- Architected and led development of the core product SPA (React + TypeScript + MongoDB), cutting page load time by 30% through code splitting, lazy loading, and server-side caching — directly improving user retention.
- Deployed and managed scalable infrastructure on AWS; implemented CI/CD pipelines that reduced deployment time from hours to under 15 minutes.
- Ran weekly code reviews and introduced engineering standards that reduced bug rate by an estimated 40% within 3 months of joining.

Full-Stack Developer (Contract) — Holoway

Dec 2023 – Mar 2024

- Shipped 3 client MVPs in under 6 weeks each using MERN stack + Firebase; one reached 500 active users in its first month with zero performance incidents.
- Integrated Stripe payment processing and Mapbox geolocation into a live marketplace — platform began processing real transactions within 3 weeks of launch.
- Built SEO-optimised marketing sites with analytics dashboards; average organic traffic improved 60% within 8 weeks post-launch.

Frontend Developer — Techy Teams

Sep 2023 – Feb 2024

- Built a 40-component Storybook library that cut frontend dev time by ~35% and eliminated design drift across the product — new features shipped consistently with existing UI.
- Defined and consumed REST API schemas collaboratively with backend engineers, reducing integration bugs by standardising contract-first development.

Full-Stack Developer & Technical Tutor — OLAK TECH

Jun 2022 – Sep 2023

- Built and shipped full-stack applications using Node.js, JavaScript, and modern frameworks. Mentored junior developers through code reviews and workshops.
- Introduced agile/scrum practices to the team; improved sprint predictability and delivery consistency within 6 weeks of adoption.

TECHNICAL SKILLS

Frontend: React, Next.js, TypeScript, JavaScript, Vue.js, Tailwind CSS, HTML5, CSS3, Redux, Zustand

Backend: Node.js, Express, MongoDB, PostgreSQL, RESTful APIs, Firebase, Supabase

Mobile: React Native (iOS & Android)

Cloud & DevOps: AWS (Certified Solutions Architect), Vercel, Docker, CI/CD, Git

Web3 / Blockchain: Solidity, Ethereum, Web3.js, IPFS, Smart Contracts, The Graph

Creative / 3D: Three.js, react-three-fiber, WebGL, GSAP

Tools: Jest, Storybook, Socket.io, WebSockets, Figma, Agile/Scrum

CERTIFICATIONS & EDUCATION

- AWS Certified Solutions Architect — Amazon Web Services
- Google Cloud Professional Developer — Google Cloud
- React Developer Certification — Meta
- Higher National Diploma (HND) in Computer Science — Moshood Abiola Polytechnic (2024)
